Capital Structure:

Ordinary Shares: 223.8M
3c Options: 6.0M

WESTERN AUSTRALIA

Pilbara Gold Projects – Beasley Creek & Coolyia Creek

- No field work was undertaken at either project this Quarter.
- Planning remains underway at the Coolyia Creek prospect for additional sampling along the unconformity surfaces as well as for lode style quartz reef associated gold within the older basalts (Figs 1 and 2).

GHANA

- The Company continues to pursue a sale or farm-out of all or some of its Ghana licence holdings held by its wholly owned Ghana subsidiary, Carlie Mining Limited.
- The transfer by the Ghana government of the Julie West licence to Azumah Resources Limited has not yet been completed. Upon completion, Castle will receive a final cash consideration of \$250,000.

NEW OPPORTUNITIES

- The Board of Castle continue to review and evaluate for acquisition project opportunities in Australia and overseas.

CORPORATE AND FINANCIAL

- Consolidated cash position as at 30 June 2019 was \$242,288.
- Castle holds 564,020 shares in ASX listed PainChek Limited (ASX: PCK) valued at \$112,800 on 30 June 2019.
- To preserve cash resources the directors of Castle have agreed to accept ordinary shares in lieu of cash remuneration from 1 January 2019. The number of shares to be issued, subject to receiving shareholder approval, will be determined by the monthly volume weighted average price of Castle's share price for the month that the remuneration was accrued. As at 30 June 2019, directors had subscribed for 9,087,062 ordinary shares in Castle, in lieu of \$61,003 of net remuneration.

About Castle Minerals Limited

Castle Minerals is listed on the Australian Stock Exchange (ASX: CDT) and headquartered in Perth, Western Australia. In addition to its interest in the Coolyia Creek and Beasley Creek conglomerate-hosted paleo-placer style gold projects in the Pilbara region of Western Australia, it has a large contiguous tenure position in the Upper West region of Ghana, West Africa, a country with a long history of gold exploration and mining. Its Ghana licence holdings encompass large tracts of highly prospective Birimian geological terrane, the host to many of West Africa's multi-million-ounce gold mines. All of Castle's ground in Western Australia and Ghana, whilst at a relatively early stage of exploration, presents a number of targets offering opportunities for discoveries of gold and other minerals.

Cautionary Statement

The Coolyia Creek and Beasley Creek Projects are considered to be of early stage, grass roots exploration status. No Competent Person has done sufficient work in accordance with JORC Code 2012 to conclusively determine if gold is present in conglomerates on the licences or to estimate in what quantities but in each case the general integrity of mapping by the GSWA has been confirmed by geologists engaged by the Company. It is possible that following further evaluation and/or exploration work that the confidence in the information used to identify and acquire interests in the areas of interest in the Pilbara may be reduced when reported under JORC Code 2012.

Competent Persons Statement

The scientific and technical information in this Report that relates to the geology of the deposits and exploration results is based on information compiled by Mr Stephen Stone, who is an Executive Director of Castle Minerals Limited. Mr Stone is a Member of the Australian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Stone is the Qualified Person overseeing Castle's exploration projects and has reviewed and approved the disclosure of all scientific or technical information contained in this announcement that relates to the geology of the deposits and exploration results.

Forward Looking Statement

Statements regarding Castle's plans, forecasts and projections with respect to its mineral properties and programmes are forward-looking statements. There can be no assurance that Castle's plans for development of its mineral properties will proceed as currently expected. There can be no assurance that Castle will be able to confirm the presence of Mineral Resources or Ore Reserves, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of Castle's mineral properties. The performance of Castle may be influenced by a number of factors which are outside the control of the Company, its Directors, staff or contractors.

- Government of Ghana has the right to acquire a 10% free carried interest in all licences and is entitled to a 5% Gross Royalty on production. All licences are held in 100% owned Ghana based subsidiaries, Carlie Mining Limited. Where required, Castle has lodged applications for extension of the licences and in those cases may be awaiting renewal or extension of the licences.
- ^ Put Option to sell the Julie West PL to Bunda Resources Limited was exercised in October 2015. Bunda's rights were assigned to Phoenix Resources Limited, a subsidiary of Azumah Resources Limited in April 2016. Transfer by Ghana Government of the licence to Phoenix Resources Limited has not yet completed.
